

CURRICULUM VITAE

Murad Abuzerli, PhD

MSCA Postdoctoral Fellow

University of Vienna, Vienna, Austria

Contact and identifiers

Full name (as in publications)	Murad Abuzerli
Name in Azerbaijani	Murad Abuzərli
Country of residence	Austria
Institutional email	murad.abuzarli@univie.ac.at
Scientific field	Physics (quantum optics)

Profile summary

Murad Abuzerli is a Marie Skłodowska-Curie Actions postdoctoral fellow at the University of Vienna (2023–2026) on the NEOVITA project, supervised by Prof. Markus Aspelmeyer and Dr. Uroš Delić. He completed a PhD thesis in 2018–2022 at the Kastler Brossel Laboratory in Paris, supervised by Dr. Quentin Glorieux, on out-of-equilibrium dynamics in a paraxial fluid of light. He studied at ESPCI Paris, the Institut d'Optique, Paris-Saclay University, and Sorbonne University. The CV names a list of publications but does not print the references.

Education

Years	Degree	Field / thesis title	Institution, city, country
2018–2022	PhD	Thesis: Out of equilibrium dynamics in a paraxial fluid of light; supervisor: Dr. Quentin Glorieux	Kastler Brossel Laboratory, Paris, France
2017–2018	MSc	M2 Laser, Optique, Matière; double diploma of ESPCI Paris and Institut d'Optique (IOGS). Master's thesis at CEA Saclay: Influence of radiative damping on high-harmonic generation in a plasma mirror excited by an ultra-intense laser: a numeric study	Paris-Saclay University, Palaiseau, France
2014–2017	Ingénieur	Cycle Ingénieur, ESPCI Paris, PSL University	ESPCI Paris, Paris, France
2012–2014	Undergraduate studies	Physics and chemistry	Sorbonne University, Pierre and Marie Curie Campus, Paris, France
2012	Secondary-school certificate		European Lyceum, Baku, Azerbaijan

Academic and professional positions

Years	Position	Department / unit	Institution, city, country
2023–2026	MSCA Postdoctoral Fellow, NEOVITA		University of Vienna, Vienna, Austria; supervisors: Prof. Markus Aspelmeyer and Dr. Uroš Delić

Years	Position	Department / unit	Institution, city, country
2017	Intern	Imaging Physics group	Princeton University, Princeton, United States. Controlling light in a multimode fiber with its transmission matrix. Supervisors: Dr. Hugo Defienne and Dr. Thomas Chaigne
2016	Industrial intern		Robert Bosch Campus, Renningen, Germany. R&D project Hybrid Supercapacitors. Supervisors: Dr. Lars Bommer and Dr. Matthias Widmaier
2014	Intern (1 month)	Functional materials group	Humboldt University of Berlin, Berlin, Germany. Solution and gas-phase synthesis of nanostructured materials. Supervisors: Dr. Matthias Karg and Prof. Nicola Pinna
2011	Workshop intern (1 week)		Hekro-Werkzeugbau AG, Ermke, Germany

Grants and research projects

Years	Project title	Funding body	Your role
2023–2026	NEOVITA	Marie Skłodowska-Curie Actions	Postdoctoral fellow

Awards, honors and fellowships

Year	Award / honor	Awarding body
2020	Best poster award, Quantum Technologies school (QuTech2020)	Sochi, Russia

Teaching

Years	Course	Level	Institution
2020–2021	Wave physics (acoustics and optics); electromagnetism; mechanics of solid systems. 128 hours	Undergraduate laboratory and seminars	Sorbonne University, Paris, France

Languages

Language	Level
Azerbaijani	Native
Russian	Second native
English	Fluent
German	Fluent
French	Fluent
Turkish	Intermediate
