

CURRICULUM VITAE

Reyhan Hasanova, PhD, MD

Research Consultant, Real-World Evidence

Oracle France (former Cerner Enviza), Paris, France

Contact and identifiers

Full name (as in publications)	Reyhan Hasanova
Name in Azerbaijani	Reyhan Həsənova
Country of residence	France
Scientific field	Cellular biology; medical research

Profile summary

Reyhan Hasanova is a research consultant in real-world evidence at Oracle France in Paris, where she has worked since 6 April 2022, on oncology and rare diseases. She received a PhD in cellular biology from the University of Bourgogne Franche-Comté (2016–2019), with work on ANGPT2 in colorectal carcinoma, and an MD as a medical biologist from the Medical University of Azerbaijan (2007–2012). She also holds master's degrees in endocrinology and metabolism from the University of Paris-Sud (2014–2015) and in cellular and molecular signaling from the University of Bourgogne Franche-Comté (2012–2014). The CV names one journal article, in the International Journal of Cancer (2020), with a DOI.

Education

Years	Degree	Field / thesis title	Institution, city, country
January 2016–December 2019	PhD	Cellular biology. Paper stated: molecular characterization of angiopoietin-2-expressing colorectal carcinomas (Int J Cancer, 2020, doi.org/10.1002/ijc.32993). Training in statistics and data analysis (Toulouse) and biostatistics with R (Paris)	University of Bourgogne Franche-Comté, Besançon, France
September 2014–September 2015	MSc	Endocrinology and metabolism	University of Paris-Sud (Paris XI), Paris, France
September 2012–June 2014	MSc	Cellular and molecular signaling (program title in the CV: Cellular and Molecular Signalisation)	University of Bourgogne Franche-Comté, Besançon, France
September 2007–June 2012	MD	Medical biologist	Medical University of Azerbaijan, Baku, Azerbaijan

Academic and professional positions

Years	Position	Department / unit	Institution, city, country
6 April 2022–present	Research Consultant, real-world evidence		Oracle France (former Cerner Enviza), Paris, France. Oncology and rare-disease projects using claims databases and electronic health records; study reports, protocols, and statistical analysis plans; meetings with French health-system authorities
5 October 2020–30 March 2021	Scientific consultant		Business Decisions Life Sciences, Paris, France. Quality control of scientific articles and consistency with ICH E6, ICMJE, CONSORT, STROBE, PRISMA, ISPOR, and GPP3
January 2016–December 2019	Junior researcher	UMR1098	EFS Besançon, Besançon, France. Transcriptomic and clinical database; biostatistics in R; ANGPT2 and MSLN as biomarkers in colorectal cancer
September 2014–September 2015	Intern	GMPH laboratory	Kremlin-Bicêtre Hospital, Paris, France. Genes implicated in hypogonadotropic hypogonadism, studied by next-generation sequencing
January 2013–March 2013	Intern	UMR1098	EFS Besançon, Besançon, France. Role of NRP2 in epithelial-mesenchymal transition in colorectal cancer

Publications

Peer-reviewed journal articles

1. Molecular description of ANGPT2-associated colorectal carcinoma. Int J Cancer, 2020. <https://doi.org/10.1002/ijc.32993>.

Awards, honors and fellowships

Year	Award / honor	Awarding body
2015	State scholarship for doctoral study (described as 1 of 25 winners)	Azerbaijan
