

CURRICULUM VITAE

Zarifa Osmanli, PhD

Postdoctoral Fellow

BioComputing UP, University of Padua, Padua, Italy

Contact and identifiers

Full name (as in publications)	Zarifa Osmanli
Name in Azerbaijani	Zərifə Osmanlı
Country of residence	Italy
Institutional email	zarifa.osmanli@unipd.it
ORCID	0000-0003-2460-1989
Scientific field	Structural bioinformatics

Profile summary

Zarifa Osmanli is a postdoctoral fellow at BioComputing UP at the University of Padua, where she has worked since January 2024 on protein structure–function relations in cancer. She received a PhD in structural bioinformatics from the University of Montpellier and CRBM-CNRS in November 2019–December 2023, on bioinformatics tools for structural annotation of alternative proteomes. She holds an MSc in molecular biology from Ege University (2014–2017) and a BSc in biophysics from Baku State University (2009–2013). She is also a junior research assistant at the Institute of Biophysics in Baku, dated 2019–present in the CV.

Education

Years	Degree	Field / thesis title	Institution, city, country
November 2019–December 2023	PhD	Structural bioinformatics. Tools for large-scale structural annotation of alternative proteomes from alternative splicing and frameshifting	University of Montpellier, CRBM-CNRS, Montpellier, France
2014–2017	MSc	Molecular biology. GPA 3.6/4.0. Three-year Turkey scholarship	Ege University, Faculty of Biology, Izmir, Turkey
2009–2013	BSc	Biophysics. Grade 82/100. Four-year scholarship of the Ministry of Education of Azerbaijan	Baku State University, Baku, Azerbaijan

Academic and professional positions

Years	Position	Department / unit	Institution, city, country
January 2024–present	Postdoctoral fellow	BioComputing UP	University of Padua, Padua, Italy
September–November 2023	Research engineer assistant		CRBM-CNRS, Montpellier, France
2019–present	Junior research assistant	Laboratory of Integrative Biology	Institute of Biophysics, Baku, Azerbaijan

Publications

Peer-reviewed journal articles

1. Falgarone, T.; Villain, E.; Richard, F.; **Osmanli, Z.**; Kajava, A. V. Census of exposed aggregation-prone regions in proteomes. Briefings in Bioinformatics, 2023, bbad183. <https://doi.org/10.1093/bib/bbad183>.
2. **Osmanli, Z.**; Falgarone, T.; Samadova, T., et al. The difference in structural states between canonical proteins and their isoforms established by proteome-wide bioinformatics analysis. Biomolecules, 2022, 12(11), 1610. <https://doi.org/10.3390/biom12111610>.

Grants and research projects

Years	Project title	Funding body	Your role
	Twining. Grant agreement 952334. Supervisor board member, EU representative	EU Horizon 2020	Supervisor board member
February– March 2023	REFRACT. Grant agreement 823886. Improvement of tandem-repeat sets of protein isoforms with MetaRepeatFinder	EU Marie Skłodowska-Curie RISE	Secondment, one month, National University of Quilmes, Argentina

Supervision

Level	Number	Notes
Master's students		Also supervision of secondees visiting BioComputing UP for REFRACCT projects

Teaching

Years	Course	Level	Institution
8 May 2024	Structural bioinformatics	Master's. Invited lecturer	Department of Mathematics, University of Padua

Invited talks and conference participation

Year	Event, place	Type	Title of talk
29 June–3 July 2024	48th FEBS Congress, Milan, Italy	Poster	Transformation of sequence-structure properties of protein tandem repeats induced by shifted reading frames
26–28 February 2024	Training School 5, Databases and computational tools on phase separation, Brussels, Belgium	Training	
26–28 September 2023	2nd ML4NGP-REFRACT Workshop, Montpellier, France	Workshop	
19–21 April 2023	1st ML4NGP Training School, Porto, Portugal	Training	
16 February 2023	National University of La Plata, La Plata, Argentina	Seminar	Large-scale bioinformatics analysis of the dark proteome

Year	Event, place	Type	Title of talk
February–March 2022	Hackathon	Group task	Finding tandem-repeat proteins with strange or novel folds by AlphaFold
17 May 2022	Institute of Physics, Baku, Azerbaijan	Workshop	Proteome-wide bioinformatics analysis of protein amyloidogenicity
14–18 November 2021	Protein Signalling Conference, Copenhagen, Denmark	Poster	Proteome-wide bioinformatics analysis reveals that isoforms are more prone to aggregate than canonical proteins
26–29 July 2021	4th International Splicing Conference, Lisbon, Portugal	Shotgun presentation	Structural and functional annotation of alternative proteomes derived from splicing
15 March 2021	CRBM-CNRS, Montpellier, France	Seminar	Structural-functional annotation of alternative proteomes
5 February 2021	Institute of Biophysics, ANAS, Baku, Azerbaijan	Seminar	Alternative proteomes derived from the frameshift mechanism
3–6 March 2020	Second International Scientific Conference of Young Scientists and Specialists, ANAS, Baku, Azerbaijan	Abstract	Neighbours of human cancer genes
24–25 May 2019	2nd International Conference One Health: Problems and Solutions, Baku, Azerbaijan	Oral	In silico analysis of the prion gene in local Turkish buffaloes
5–6 May 2017	International Students Science Conference, Izmir, Turkey	Oral	Bioinformatics approaches for PRNP gene analysis in Bubalus bubalis
